I. Comprehensive Zoology

COMPILED BY

S. MARKOWSKI, D.Sc.

This section includes works that deal with more than one branch of zoology, or that are of general interest to zoologists. It is, therefore, not complete in itself as regards any one subject included in it. The special sections complete each subject. A few memoirs included in the special sections are repeated in this section. No attempt is made to include all works on genetics or physiology as these subjects are more suitably covered by the Imperial Bureau of Animal Genetics and *Resumptio Genetica*.
